RECOMMENDED SOULFRAME SIZE PER SKATE BOOT SIZE	MONDOPOINT: <235 to 270 EU SIZES: 37 to 42 US SIZES: 5 to 9	MONDOPOINT: 270 to 285 EU SIZES: 42 to 44 US SIZES: 9 to 11	MONDOPOINT: 270 to 295 EU SIZES: 42 to 46 US SIZES: 9 to 13

COMPATIBILITY

Kizer SOULFRAMEs are compatible with all flat bottom UFS skate boots. Boots with raised heel (such as USD Sway) will not fit properly.

Salomon ST boot shells have to be modified in order to create a flat surface to which the Soulframe can be mounted. Sizes ranging from 27.0 to 28.5 (us 8,5 to 10 / eu 42,3 to 45) will accept the plate using 4 holes at the front and 2 on the heel. All other shells will require the drilling of additional holes.

INTENDED USE

- Aggressive Skating in wooden skateparks and bowls (with metal h-blocks, for full metal grinding experience).
- Aggressive Skating on concrete skateparks and street will require you to add plastic sliders and plastic h-blocks.
- For flat / Rockered setups. Anti-rocker set-ups are not recommended, but still possible.
